EDUCATION

- **Delhi Technological University** New Delhi, India
B.Tech in Electrical Engineering | CGPA: 8.63 2024 – 2028
- **Amity International School** New Delhi, India
Class XII: 96.0% | Class X: 99.4% 2022 – 2024

EXPERIENCE

- **TestingXperts** India
Generative AI Summer Intern June 2025 – August 2025
 - Architected a **FastAPI + React** platform with secure auth (HttpOnly cookies, CSRF protection, Google OAuth 2.0).
 - Developed AI-driven question generation using OpenRouter + sentence-transformers with a **Graph-RAG** retrieval pipeline, reducing hallucinations by **99%**.
 - Engineered automated report generation via **Celery**-based async tasks and embedding-driven weakness clustering.

PROJECTS

- **StyleSphere** — Multimodal Fashion AI, Virtual Try-On, Semantic + Heuristic Search (2025) [Github]
 - Extended **HR-VITON** with **CBAM**-augmented ResBlocks and region-aware evaluation (SCHP + CLIP) for high-resolution (1024×768) garment synthesis and identity preservation.
 - Achieved **0.91 SSIM**, **0.12 LPIPS**, and **+18%** CLIP similarity (1,200+ images) while building **CLIP + Pinecone** ANN search with sub-**1.2s** retrieval.
 - Architected **StyleRAG** using LLaMA3 with multimodal routing, BLIP caption ingestion, and vector-conditioned response generation for fashion reasoning and recommendation.
- **NxtDevs** — RAG-based Question Generation Engine [Website] [Github]
 - Architected **FastAPI + Next.js** system with **Redis** (cache + pub/sub), **Celery** workers, and **WebSocket**-based low-latency **1v1 duels** with **ELO matchmaking**.
 - Built a personalized **RAG tutor** with **prompt chaining** using **user history**, **bias signals**, and **execution logs**.
 - Built adaptive retrieval over **LeetCode GraphQL** data with **metric-weighted ranking** for problem scheduling.
- **DeepShield** — Deepfake Detection System [Github]
 - Engineered a multi-stage video forensics pipeline combining **ESRGAN** super-resolution, **MTCNN** face extraction, and a **ResNeXt50 + LSTM** spatiotemporal classifier.
 - Implemented staged backbone unfreezing and sequence-aware temporal fusion to stabilize spatiotemporal learning.
 - Achieved **0.927 ROC-AUC**, **85% recall**, and **83% F1** across cross-architecture benchmarks.

TECHNICAL SKILLS

- **Languages:** C++, Python, HTML, CSS, JavaScript, React, Typescript, SQL
- **ML / AI:** NumPy, Pandas, Scikit-learn, TensorFlow, OpenCV, CLIP, LangChain
- **Backend & Databases:** FastAPI, Supabase, PostgreSQL, MySQL, Redis
- **DevOps & Tools:** Docker, Celery, Linux, Git, VS Code, Jupyter

ACHIEVEMENTS

- **Winner** among **2500+** teams at Hack4Delhi — Railway Tampering & Anomaly Detection.
- Selected among Top **60** startups out of **700+**, awarded **Rs1,00,000** funding by DTTE, Govt. of Delhi.
- Secured **3rd** place at Nano Navigator Micromouse Competition, APOGEE **2025** (BITS Pilani).
- LeetCode: **Rating 1676 (Top 15%)** | 150+ problems solved

CERTIFICATIONS

- Machine Learning Specialization — **DeepLearning.AI**
- Deep Learning Specialization — **DeepLearning.AI**
- Generative Adversarial Networks Specialization — **DeepLearning.AI**
- Generative AI with LLMs — **DeepLearning.AI**
